Anti-Rabbit IgG (H+L), (PE Conjugate)

Catalog: OM296288

☐ 100ug

Product profile

Product name	Anti-Rabbit IgG (H+L), (PE Conjugate)
Antibody Type	Secondary Antibodies
Product description	Affinity purified goat anti-rabbit IgG (H+L) antibody is conjugated to R-phycoerythrin. This product has be en optimized for use as a secondary antibody in flow applications. Excitation is 450-580 nm and peak emi ssion is 590 nm.

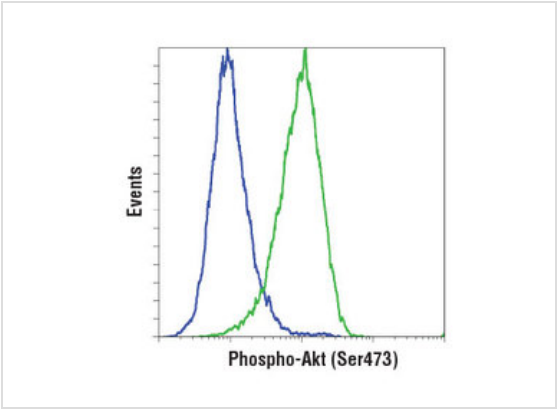
Key Feature

Clonality	Monoclonal
Tested Applications	WB ,IP ,IHC ,IF ,FC ,ChIP
Species Reactivity	Rabbit
Concentration	1 mg/ml
Purification	

Target Information

Tissue Specificity	Anti-Rabbit IgG (H+L), (PE Conjugate) reacts with heavy and light chain of most rabbit immunoglobulins. No cross-reactivity to other serum proteins has been detected. Less than 1% cross-reactivity is observed with immunoglobulins from other species.

Application



Application

Flow cytometric analysis of Jurkat cells, untreated (green) or treated with LY294002 #9901, Wortmannin #9951, and U0126 (blue), using Phospho-Akt (Ser473) (D9E) XP ® Rabbit mAb #4060. Anti-Rabbit IgG (H+L), (PE Conjugate) was used as a secondary antibody.

Additional Information

Storage Instructions	The optimal dilution of the secondary antibody should be determined for each application. However, a fin al dilution of 1:500 should yield acceptable results for most flow cytometry applications. **Storage:** Supplied in 10 mM HEPES, 150 mM NaCl, pH 7.4, 0.08% sodium azide. Store at 4°C. Protect fro m light for up to one year. Do not freeze.
Storage Buffer	phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Note	The product is for research use only,not for use in diagnostic or therapeutic procedures.
