Anti-mouse IgG (H+L), F(ab')₂ Fragment (Alexa Fluor® 594 Conjugate)

Catalog: OM296272

☐ 100ug

Product profile

Product name	Anti-mouse IgG (H+L), F(ab') ₂ Fragment (Alexa Fluor® 594 Conjugate)
Antibody Type	Secondary Antibodies
Product description	Anti-mouse IgG (H+L), F(ab') ₂ Fragment was conjugated to Alexa Fluor® 594 fluorescent dye under optimal conditions and formulated at 2 mg/ml. This F(ab') ₂ fragment results in less non-specific binding to cells through Fc receptors.

Key Feature

Clonality	Monoclonal
Tested Applications	WB ,IP ,IHC ,IF ,FC ,ChIP
Species Reactivity	Mouse
Concentration	1 mg/ml
Purification	

Target Information

Tissue Specificity	F(ab') ₂ fragments are prepared from goat antibodies that have been adsorbed against human IgG and human serum.
--------------------	--

Application

Application

Immunofluorescent analysis of HeLa cells using β -Catenin (L54E2) Mouse mAb (IF Preferred) detected with Anti-mouse IgG (H+L), F(ab')₂ Fragment (Alexa Fluor® 594 Conjugate) (red). Blue pseudocolor = DRAQ5® (fluorescent DNA dye).

Application

Flow cytometric analysis of untreated Jurkat cells using Akt (5G3) Mouse mAb detected with Anti-mouse IgG (H+L), F(ab')₂ Fragment (Alexa Fluor® 594 Conjugate) (blue) compared to concentration-matched Mouse (G3A1) mAb IgG1 Isotype Control (red).

Additional Information

Storage Instructions

The optimal dilution of the anti-species antibody should be determined for each primary antibody by titration. However, a final dilution of 1:250 - 1:1000 should yield acceptable results for immunofluorescent and flow cytometry assays.

Storage: Supplied in 0.1 M sodium phosphate, 0.1 M sodium chloride, pH 7.5, 5 mM sodium azide. Store at 4°C. Do not aliquot the antibody. Protect from light. Do not freeze.

Storage Buffer

phosphate buffered saline, pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Note

The product is for research use only, not for use in diagnostic or therapeutic procedures.
