Cox-2 Antibody (H-62) PE

Catalog: OM159980

☐ 100ul

Product profile

Product name	Cox-2 Antibody (H-62) PE
Antibody Type	Primary Antibodies
Modification Notes	Prostaglandins are a diverse group of autocrine and paracrine hormones that mediate many cellular and physiological processes. Prostaglandin H2 (PGH2) is an intermediate molecule in formation of the prostaglandins. Cyclooxygenase-1 (Cox-1) and cyclooxygenase-2 (Cox-2) are prostaglandin synthases that catalyze the formation of PGH2 from arachidonic acid (AA). Cox-1 and Cox-2 are isozymes of prostaglandin-endoperoxidase synthase (PTGS). Cox-1 is constitutively expressed in most tissues and is thought to serve in general "housekeeping" functions. Cox-2 is efficiently induced in migratory cells responding to pro-inflammatory stimuli and is considered to be an important mediator of inflammation. Both enzymes are targets for the nonsteroidal therapeutic anti-inflammatory drugs, NSAIDs .

Key Feature

Clonality	Polyclonal
Isotype	IgG
Host Species	Rabbit
Tested Applications	WB ,IP ,IF ,FC ,ELISA
Species Reactivity	Human Mouse Rat
Concentration	1mg/ml
Purification	Affinity purified

Target Information

Alternative Names	epitope corresponding to amino acids 50-111 of Cox-2 of human origin
Tissue Specificity	epitope corresponding to amino acids 50-111 of Cox-2 of human origin

Database Links

Entrez Gene	5743
-------------	------

Application

Application

Immunoperoxidase staining of formalin fixed, paraffin-embedded human urinary bladder tissue showing cytoplasmic and nuclear staining of urothelial cells.

Application

Western blot analysis of Cox-2 expression in PMA + LPS-induced RAW 264.7 whole cell lysate.

Application Notes

recommended for detection of Cox-2 of mouse, rat and human origin by WB, IP, IF, FCM and ELISA ; also reactive with additional species, including equine, canine, bovine and porcine:

Additional Information

Form	Liquid
Storage Instructions	For short-term storage, store at 4° C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Storage Buffer	phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Note	The product is for research use only,not for use in diagnostic or therapeutic procedures.
