Fetal Bovine Serum (FBS), US Origin, Gamma-irradiated

Catalog: OM296320

☐ 500 mL

Product profile

Product name	Fetal Bovine Serum (FBS), US Origin, Gamma-irradiated
Product description	Product OverviewGamma irradiation is a process which involves exposing material to high energy gamma photons released by radioisotopes, such as cobalt 60. This energy is transferred from the photons to the products, and is responsible for organism inactivation by ionization of nucleic acid bonds. The irradiation of serum is intended to provide complete assurance of viral inactivation.

Key Feature

Isotype	Cocktail
Host Species	Alligator
Purification	Affinity purified

Additional Information

Storage Instructions	-20°C
Note	The product is for research use only,not for use in diagnostic or therapeutic procedures.
