GST Antibody (1-109)

Catalog: OM166333

☐ 100ul

Product profile

Product name	GST Antibody (1-109)
Antibody Type	Tags Antibodies
Modification Notes	Plasmid vectors for the expression of coding regions of eukaryotic genes in E. coli are in common usage; such expression vectors often encode hybrid fusion proteins containing part prokaryotic and part eukaryotic specified proteins. For instance, the pGEX.3X expression vector developed by Smith and Johnson allows for synthesis of fusion proteins between glutathione-S-transferase (GST) and proteins encoded by inserted cDNA sequences. Antibodies derived from these GST fusion proteins are useful for checking protein expression both in plaques and on Western blots as well as for immunoaffinity purification of proteins expressed in E. coli.

Key Feature

Clonality	Polyclonal
Isotype	IgG
Host Species	Rabbit
Tested Applications	WB ,IP ,IF ,ELISA
Species Reactivity	Human Mouse Rat
Concentration	1mg/ml
Purification	Affinity purified

Target Information

Alternative Names	epitope corresponding to amino acids 1-109 mapping at the N-terminus of GST of Schistosoma japonicum origin
Tissue Specificity	epitope corresponding to amino acids 1-109 mapping at the N-terminus of GST of Schistosoma japonicum origin

Application

Application
Western blot analysis of *S. japonicum* recombinant GST.

Application
Western blot analysis of recombinant GST under reducing conditions.

Application Notes recommended for detection of GST fusion proteins and glutathione-S-transferase (GST) of *Schistosoma japonicum* origin by WB, IP, IF and ELISA:

Additional Information

Form	Liquid
Storage Instructions	For short-term storage, store at 4° C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Storage Buffer	phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Note	The product is for research use only,not for use in diagnostic or therapeutic procedures.
