HA-probe Antibody (Y-11) PE

Catalog: OM156755

☐ 100ul

Product profile

Product name	HA-probe Antibody (Y-11) PE
Antibody Type	Primary Antibodies
Modification Notes	Plasmid vectors for the expression of coding regions of eukaryotic genes in bacterial, insect and mammalian hosts are in common usage; such expression vectors are frequently used to encode hybrid fusion proteins consisting of a eukaryotic target protein and a specialized region designed to aid in the purification and visualization of the target protein. For example, the pCDM8 expression vector and derivatives thereof encode fusions between the target protein and an 11 amino acid peptide derived from the influenza protein hemagglutinin (HA). The HA epitope tag is useful in Western blotting and immunohistochemical localization of expressed fusion proteins when examined with antibodies raised specifically against the HA-epitope tag.

Key Feature

Clonality	Polyclonal
Isotype	IgG
Host Species	Rabbit
Tested Applications	WB ,IP ,IF ,FC ,ELISA ,ChIP
Species Reactivity	Human Mouse Rat
Concentration	1mg/ml
Purification	Affinity purified

Target Information

Alternative Names	epitope mapping within an internal region of the influenza hemagglutinin (HA) protein
Tissue Specificity	epitope mapping within an internal region of the influenza hemagglutinin (HA) protein

Application

Application

Western blot analysis of HA-probe expression in HA tagged β 2B Tubulin (A), HA tagged 3pk (B) and HA tagged PTP 1B (C) transfected lysates.

Application

Antibodies tested include HA-probe (Y-11)-G: (A) and HA-probe (Y-11): (B,C).

Application

Immunofluorescence staining of methanol-fixed COS cells transfected with HA fusion protein showing cytoplasmic staining.

Application Notes recommended for detection of proteins containing the HA tag by WB, IP, IF, FCM and ELISA:

Additional Information

Form	Liquid
Storage Instructions	For short-term storage, store at 4° C. For long-term storage, aliquot and store at -20°C or below. Avoid multiple freeze-thaw cycles.
Storage Buffer	phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.
Note	The product is for research use only,not for use in diagnostic or therapeutic procedures.
