Mouse Anti-rabbit IgG (Light-Chain Specific) (L57A3) mAb

Catalog: OM296301

☐ 100ug

Product profile

Product name	Mouse Anti-rabbit IgG (Light-Chain Specific) (L57A3) mAb
Antibody Type	Secondary Antibodies
Product description	Affinity purified mouse anti-rabbit IgG (Light-Chain Specific) antibody. This product has been optimized for use as a secondary antibody in Western blotting applications.

Key Feature

Clonality	Monoclonal
Tested Applications	WB ,IP ,IHC ,IF ,FC ,ChIP
Species Reactivity	Rabbit
Concentration	1 mg/ml
Purification	

Target Information

Tissue Specificity	Mouse Anti-rabbit IgG (Light-Chain Specific) (L57A3) mAb recognizes the light chain of rabbit IgG, either in native conformation or denatured and reduced form. It does not bind to the denatured and reduced rabbit IgG heavy chain (about 50 kDa) on western blot.
---------------------------	--

Application

Application

Western blot analysis of decreasing concentrations of total rabbit IgG reduced and denatured in 1X SDS loading buffer with DTT using Mouse Anti-rabbit IgG (Conformation Specific) (L27A9) mAb (Panel A), Mouse Anti-rabbit IgG (Light-Chain Specific) (L57A3) mAb (Panel B), or Anti-rabbit IgG, HRP-linked Antibody (Panel C). For Panels A and B, the bound mouse anti-rabbit IgG mAb was detected by Anti-mouse IgG, HRP-linked Antibody # 7076. The positions of the reduced and denatured rabbit IgG heavy and light chains are indicated.

Additional Information

Storage Instructions

Storage: Supplied in 10 mM sodium HEPES (pH 7.5), 150 mM NaCl, 100 µg/ml BSA, 50% glycerol and less than 0.02% sodium azide. Store at –20°C. Do not aliquot the antibody.

Storage Buffer

phosphate buffered saline , pH 7.4, 150mM NaCl, 0.02% sodium azide and 50% glycerol.

Note

The product is for research use only, not for use in diagnostic or therapeutic procedures.
