# PLTMax® Human Platelet Lysate

Catalog: OM296328

☐ 100 mL ☐ 100 mL

## Product profile

Product name	PLTMax® Human Platelet Lysate
Product description	<p>Product Information To order this product, please contact Biological Industries USA directly at <a href="mailto:orders@omnimabsusa.com">orders@omnimabsusa.com</a>. PLTMax® Human Platelet Lysate is a growth factor-rich supplement that is a superior alternative to fetal bovine serum (FBS) for cell culture, including human mesenchymal stem cell (MSC) culture. PLTMax® has a proven track record of clinical use. It has been used to grow cells that have been used in hundreds of patients around the world. PLTMax® is used as a manufacturing component in the generation of adult stem cells in clinical trials in North America, Europe, South America, Middle East, Asia and Australia (Phase I to Phase III) in indications including neurology, nephrology, gastrointestinal disease, wound repair and cardiology. Manufactured to reduce lot-to-lot variation Reduced supplementation (PLTMax® is used at half the concentration of FBS) Contains more than 100 growth factors and proteins Enhances genetic stability in stem cell cultures Used in more than 30 clinical trials worldwide PLTMax® Human Platelet Lysate is derived from normal human donor platelets collected at U.S. blood centers. Multiple donor units are pooled in large batch sizes and manufactured to produce a consistent product. Addition of an anti-coagulant, such as heparin, is required to inhibit coagulation in media supplemented with PLTMax®. Add heparin to a final concentration of 2 U/mL when preparing complete medium. Real time imaging of Adipose-derived MSCs from day 0 to day 5 of culture</p>

## Additional Information

Form	Liquid
Note	The product is for research use only, not for use in diagnostic or therapeutic procedures.
