Product profile

Product name	YEATS4 Antibody
Antibody Type	Primary Antibodies
Product description	The protein encoded by this gene is found in the nucleoli. It has high sequence homology to human MLLT 1, and yeast and human MLLT3 proteins. Both MLLT1 and MLLT3 proteins belong to a class of transcription factors, indicating that the encoded protein might also represent a transcription factor. This protein is thought to be required for RNA transcription. This gene has been shown to be amplified in tumors.1) Heisel, S., et al. BMC Mol. Biol. 11, 53 (2010) :
Immunogen	This YEATS4 antibody is generated from rabbits immunized with a recombinant protein from human YEATS4.
