beta-Amyloid Peptide(1-40)(human) high purity

Cat No.: OM770621

Summary

Product name	beta-Amyloid Peptide(l-40)(human)
Describe	beta-Amyloid (l-40).Implicated in Alzheimer's disease.
CAS No.	l0776l 42-2
Molecular Weight	4329.6 Da
Formula	C573H902N146O165S1Se5
Sequence	Asp-Ala-Glu-Phe-Arg-His-Asp-Ser-Gly-Tyr-Glu-Val-His-His-Gln-Lys-Leu-Val-Phe-Phe-Ala-Glu-Asp-Val-Gly-Ser-Asn-Lys-Gly-Ala-Ile-Ile-Gly-Leu-Met-Val-Gly-Gly-Val-Val
Assay	>97%
PubChem No.	
Store	Store at-20°C.Store under desiccating conditions.The product can be stored for up to l2 months.
Solubility	Solubility is batch-dependent.Please refer to the Protocol Booklet and the batch-specific CoA for more information. This product is supplied in one (or more)pack size which is freeze dried.Therefore the contents may not be readily visible,as they can coat the bottom or walls ofthe vial. Solvents listed may be unsuitable for use in biological experiments.These solvents are intended to enable solubilisation and mixing of components.We recommend that biologicallyunsuitable solvents are removed prior to solubilisation in experimental media.
Processing method	Wherever possible,you should prepare and use solutionson the same day. However,ifyou need to make up stock solutions in advance,we recommend that youstore the solution as aliquots in tightly sealed vials at-20°C.Generally,these will be useable for up to one week.Before use,and prior to opening the vial werecommend that you allow your product to equilibrate to room temperature for at least l hour. Amyloidβ(l-40)human peptide should be initially dissolved according to this method:Add a smallamount of l%NH_4OH directly to the lyophilized solid(50-l00 µlshould be sufficientfor lmg of peptide)Dilute to a concentration of lmg/ml or less with your buffer.Vortexgently to mix(less than l minute).The peptide cannot be stored long term in l%NH_4OH,therefore it is important to immediately dilute the NH_4OH/peptide solution with PBS or other buffer to a concentration of l mg/ml.
