B-27 Plus Supplement (50X)

Catalog: OM760016

☐ 10mL

Product profile

Product name B-27 Plus Supplement (50X)

Source Serum-free

Product Specifications

Form Liquid

Save conditions Store in a freezer (-5 to -20°C) protected from light for 12 months.

Product Details

The B-27 Plus Supplement is the next generation of the frequently cited neuronal cell culture product, the B-27 Supplement. It is a serum-free supplement that, when used in conjunction with Neurobasal Plus Medium, can provide a higher in vitro survival rate of primary neurons derived from rodents and human stem cells. The B-27 Plus Supplement features an optimized formulation, upgraded production processes, and more stringent quality control measures for raw materials and final products. Compared with other neuronal cell culture medium systems, these improvements have achieved a higher neuronal cell survival rate, greater electrophysiological activity, and a higher level of functional maturity.
