## Prestained protein marker (10-180kDa)

Catalog: OM750025

☐ 10×250ul ☐ 2×250ul

### Product profile

Product Name	Prestained protein marker (10-180kDa)
Form / State	Liquid
Product description	The prestained protein marker is a mixture of 11 kinds of proteins stained with blue, orange and green (ranging from 10 to 180 kDa), which can be used as a molecular weight standard in protein electrophoresis (SDS-PAGE) and Western blotting. The protein molecular weight standard is provided in a ready-to-use format and can be directly loaded onto the gel; there is no need to heat, reduce or add loading buffer before use.
Storage condition	Transport on wet ice or dry ice and store at -20°C.
